Iñigo Urteaga

https://iurteaga.github.io

Research scientist working on probabilistic machine learning for descriptive, predictive, and prescriptive tasks. I have specialized in Bayesian Theory, computational statistics, generative modeling, approximate inference, and sequential decision processes. My research focuses on methodological and applied aspects of probabilistic machine learning.

Professional Appointments and Experience

01/2023 **Ikerbasque Research Fellow**, *Basque Center for Applied Mathematics (BCAM)*, Bilbao, Spain
- Tenure-track researcher at BCAM's Machine Learning group.
  - Statistical modeling of real-life, time-varying phenomena, collected via not-at-random measurements.
  - Deep generative models: methodology and applications
  - Reinforcement learning, control theory, and policy evaluation with applications.

04/2018 – 12/2022 **Associate Research Scientist**, *Columbia University*, New York City, NY (USA)
- Descriptive modeling: *Bayesian deep generative modeling for mobile-health data.*
  - Phenotyping algorithms and models for healthcare data.
- Predictive modeling: *Accurate and robust prediction with uncertain and sparse measurement data.*
  - Gaussian processes and deep-learning for reconstruction and forecasting of hormonal dynamics.
  - Personalized, deep and generative models for health events with self-tracked mobile-health data.
- Prescriptive modeling: *Sequential decision making in complex practical scenarios.*
  - Multi-armed contextual bandits: theory and real-life applications.

09/2016 – 04/2018 **Postdoctoral Research Scientist**, *Columbia University*, New York City, NY (USA)
- Unsupervised phenotyping of endometriosis via self-tracked, smartphone based mobile health data.
- Mechanistic modeling and machine learning for the female hormonal cycle.
- Multi-armed contextual bandits: Thompson sampling and variational inference.

07/2009 – 07/2011 **Researcher**, *Tecnalia-Telecom*, Zamudio (Spain)
- SAIL: Human mobility analysis and pattern extraction. Complex network analysis.
- TelMAX: Mobile communication system design, multimedia applications and heterogeneous networks.

01/2009 – 07/2009 **Telecommunication Engineer**, *Traintic*, Donostia (Spain)
- Infrastructure-to-vehicle (I2V), Vehicle-to-vehicle (V2V) and On-Board networking on railways.

08/2007 – 06/2008 **Research Assistant**, *Colorado School Of Mines*, Golden, Colorado (USA)
- Wireless sensor networking and distributed systems (supervised by Dr. Qi Han)

04/2005 – 06/2007 **Research Scholarship**, *NQaS research group within (EHU/UPV)*, Bilbao (Spain)
- Network quality and service (supervised by Alex Muñoz Mateos)

Education

2011–2016 **Ph.D. in Electrical Engineering**, *Stony Brook University (USA)*, *GPA*: 3.97/4.0
- Dissertation
  - *Sequential Monte Carlo methods for inference and prediction of latent time-series.*
- Advisor: Prof. Petar M. Djurić
- Research Topics
  - Particle filtering for time-series: ARMA, FARIMA, fractional Gaussian processes.
  - Bayesian theory: parameter estimation, Rao-Blackwellization and hierarchical models.
  - Bayesian model selection and averaging.
  - Non-parametric Bayesian methods: Gaussian processes for regression and prediction.
  - Robust signal processing: outlier and missing data.
- Selected Courses
  - Stochastic processes, Probabilistic graphical models, Detection and estimation theory, Pattern recognition, Digital signal processing, Machine learning.

2002–2008 **M.S. Telecommunication Engineering**, *UPV-EHU*, Bilbao (Spain), *Grade*: 7.9/10
- Master Thesis (*Grade*: 10/10) supervised by Dr. Qi Han at Colorado School Of Mines (USA)
  - *REDFLAG: A Run-timE, Distributed, Flexible, Lightweight, And Generic Fault Detection Service for Data-Driven Wireless Sensor Applications.*

2000–2002 **Scientific Baccalaureate**, *Axular Lizeoa*, Donostia (Spain), *Grade: Honours*

Research projects and grants

09/01/2023 – 08/31/2027 **US, National Science Foundation, IIS - SCH**, *Award ID 2306690*, $1,197,325, "*Human-Centered Reinforcement Learning for Personalized Coaching in Health*" PI Lena Mamykina (Columbia University), Co-PI Iñigo Urteaga.

12/15/2022 – 12/14/2025 **LaCaixa Foundation's Junior Leader Incoming**, *Awarded, LCF/BQ/PI22/11910028*, $300,000, "*Statistical machine learning for real-life time-varying phenomena, collected via not-at-random measurement processes*". PI Iñigo Urteaga

03/01/2021 – 01/28/2023 **eBay Research & University Partnership for Technology**, *Awarded*, $125,000, "*Online optimization of Transformer-based Natural Language models: a Bandit based approach*" PI Iñigo Urteaga (Columbia University).

02/01/2019 – 01/31/2023 **US, National Institute of Health**, *R01 LM013043: Awarded*, $1,620,000, "*PhendoPHL: A Data-Science Enabled Personal Health Library to Manage Endometriosis*" PI Noémie Elhadad; Co-I Iñigo Urteaga (Columbia University).

02/15/2014 – 01/31/2020 **US, National Science Foundation**, *IIS-1344668: Awarded*, $1,994,224, SCH:INT "*Large-Scale Probabilistic Phenotyping Applied to Patient Record Summarization*" PI Noémie Elhadad, Co-PI Chris H. Wiggins, Investigator Iñigo Urteaga (Columbia University).

Awards

2021 **2021 STAT Wunderkind**, *In recognition of my early-career scientific work*
Significant contributions on statistical modeling and machine learning for mobile health data.

2023 **AISTATS 2023 Top Reviewer**, *Amongst the top 10% highest-scoring reviewers*

2020 **NeurIPS Top Reviewer**, *Amongst the top 10% highest-scoring reviewers*

2019 **NeurIPS Top Reviewer**, *Amongst the 400 highest-scoring reviewers*

2018 **NeurIPS Top Reviewer**, *Amongst the 30% highest-scoring reviewers*

2016 **Best Graduate Student**, *Electrical and Computer Engineering at Stony Brook University*
Armstrong Memorial Research Foundation

Spring 2016 **Provost Graduate Lecture Series Speaker**, Stony Brook University, USA
Lecture available online at https://youtu.be/67KfUVXlkl0

Fall 2015 **Distinguished Travel Award for Fall 2015**, Stony Brook Graduate School

2015 **Professional Development Awards Program**, *Stony Brook University*
New York State and Graduate Student Employees Union

2009-2011 **Torres Quevedo Research Fellowship**, *PTQ-09-02-01814*, Robotiker-Tecnalia
Ministerio de Ciencia e Innovación, España

2007 **Global Education for European Engineers and Entrepreneurs**, *GE4 award*
American-European Engineering Exchange Student: Master Thesis abroad

Academic leadership & mentoring

Ph.D. dissertation defense committee member

- *Predictive Machine Learning for menstrual cycle data* by Kathy Li (04/11/2022)
  Department of Applied Physics and Applied Mathematics, Columbia University
- *Learning Latent Variable Models: Efficient Algorithms and Applications* by Matteo Ruffini (02/14/2019)
  Department of Computer Science of Universitat Politecnica de Catalunya

Ph.D. student mentoring & advising

- Mert Ketenci (expected graduation 12/2024), advised by Prof. Noémie Elhadad
  Computer Science, Columbia University
- Kathy Li (graduated 05/2022), advised by Prof. Chris Wiggins
  Applied Physics and Applied Mathematics and Data Science Institute, Columbia University
- Adrienne Pichon (expected graduation 12/2023), advised by Prof. Noémie Elhadad
  Department of Biomedical Informatics, Columbia University
- Gal Levy-Fix (graduated 06/2020), advised by Prof. Noémie Elhadad
  Department of Biomedical Informatics, Columbia University
- Mollie McKillop (graduated 05/2019), advised by Prof. Noémie Elhadad
  Department of Biomedical Informatics, Columbia University

Master student advising

- Aitor Diaz Uriondo (expected graduation 09/2024)
  Gaussian Processes with observations missing not-at-random.
  EHU-UPV Master on Statistical, Computational and Mathematical Modeling
- Mikel Sanchez (expected graduation 07/2024)
  Thompson sampling for multi-scale bandit problems.
  EHU-UPV Master on Statistical, Computational and Mathematical Modeling
- Regis Konan Marcel Djaha (expected graduation 07/2024)
  Deep Latent Variable generative modeling with applications.
  BCAM, African Institute for Mathematical Sciences (AIMS)
- Quentin Chu (expected graduation 12/2023)
  Reinforcement Learning for individualized self-management using via mobile health.
  Computer Science, Columbia University
- Siddhant Pravin Mahurkar (graduated 12/2022)
  Natural Language Processing and Reinforcement Learning in the context of a nutritional chatbot.
  Data Science Institute Scholars Project, Columbia University
- Moulay Zaidane Al Bahi Draidia (graduated 06/2022)
  Multi-armed bandit optimization for Transformer-based natural language models.
  Data Science Institute, Columbia University
- Kenny Jin (graduated 12/2021)
  Transformer-based natural language models: pre-training and fine-tuning.
  Data Science Institute, Columbia University
- Aimee Moses (graduated 12/2020)
  Statistical signal processing for self-tracked mobile health data.
  Applied Mathematics, Columbia University

Undergraduate student advising

- Dinko Franceschi (Spring 2018)
  Multi-armed bandits, Data Science Institute, Columbia University.
- Edward Yu (Spring & Fall 2017), co-advised with Prof. Chris Wiggins
  Multi-armed bandits and statistical data analysis, Data Science Institute, Columbia University.
- Su Hang (Fall 2016, Spring 2017), co-advised with Prof. Chris Wiggins
  Statistical data analysis for cancer datasets, Data Science Institute, Columbia University.
- Malvin De Nunez, Jouse Nassar, Ian Jacobsen, William Dwyer (Spring 2016)
  SVMs for fetal heart-rate classification, Senior design project, Stony Brook University
- Lars Folkerts, Shan Liu (Fall 2013 – Spring 2014)
  Summer research, statistical signal processing and webserver development, Stony Brook University.

Scientific presentations

Invited talks

- "*Multi-armed bandits for resource-efficient online optimization of language model pre-training: the use case of dynamic masking*", eBay Inc. Applied Research, Invited talk (01/11/2023)
- "*Probabilistic Machine Learning for Menstrual Cycle Length Predictions via mobile health apps: disentangling menstruation patterns from self-tracking adherence*"
  Applied Center for Data Science Seminar, Western Kentucky University. Invited Speaker (11/04/2022)
- "*Probabilistic machine learning for predictive models of mobile health data*"
  The University of Iowa Computer Science Department Colloquium. Invited Speaker (09/26/2022)
- "*Statistical learning of the menstrual cycle from noisy and missing hormone observations.*"
  Banff International Research Station's workshop "*BIRS Dynamics and Data Assimilation, Physiology and Bioinformatics: Mathematics at the Interface of Theory and Clinical Application*". (06/02/2022)
- "*Statistical Learning Of Menstruation From Indirect, Noisy And Missing Observations.*"
  The Rockefeller University Physics-Biology Center Studies, Seminar Series Invited Speaker (10/19/2021)
- "*Bayesian models and inference for reinforcement learning: multi-armed bandits for practical use.*"
  Corning.Inc Data Science Invited Speaker Series (04/28/2021)
- "*Bayesian models and inference for flexible and efficient multi-armed bandits*"
  eBay Research and University Partnership for Technology Tech Talk series (03/24/2021)
- "*Learning Across a Healthcare Data Network to Improve Model Robustness and Evidence Reliability*"
  Panelist, 2019 American Medical Informatics Association Symposium, Washington, D.C. (11/20/2019)
- "*Bayesian modeling and inference for predictive and prescriptive applications*"
  Basque Center for Applied Mathematics, Scientific Seminar, Bilbao (10/01/2019)
- "*Sequential Monte Carlo Bandits*"
  Multi Armed Bandit Workshop, Imperial College London (09/25/2019)
- "*Bayesian models and inference for reinforcement learning: the multi-armed bandit case*"
  Department of Computer Science of Universitat Politecnica de Catalunya (02/15/2019)
- "*Variational Inference for the Multi-Armed Contextual Bandit*"
  12th Annual Machine Learning Symposium, New York Academy of Sciences (03/09/2018)
- "*The multi-armed bandit: from slot-machines to medicine*"
  Columbia University APAM research conference (10/13/2017)
- "*The multi-armed bandit: from slot-machines to medicine*"
  Columbia University Postdoctoral Seminar Series (09/08/2017)
- "*In Search of the Dynamics of Time-Varying Phenomena*"
  Stony Brook University, Provost Graduate Lecture Series (03/24/2016)

Media presence and Outreach activities

- Research within Elhadad's lab featured in Scientific American's video article on endometriosis (12/01/2022): "*One in ten people who menstruate suffer from endometriosis: why do we know so little about it?*"
- "*Ciencia de datos y salud (Data science in healthcare)*"
  "*La mecánica del Caracol*" Radio Euskadi (01/24/2022)
- "*Data Science Research: A Bayesian view of multi-armed bandits*"
  Comunidade Data Science Brazil, Invited Speaker (09/09/2021)
- "*Data science for reconstruction and prediction of female reproductive hormones*"
  Data Science Institute Scholars Program Seminar, Columbia University (07/30/2019)
- "*An introduction to the multi-armed bandit problem*"
  Columbia University Summer@SEAS research seminars (07/19/2017)

Other Presentations

- "*Adapting multi-armed bandits to real-life: Flexible models and approximate inference*"
  Columbia Data Science Institute: Foundations of Data Science Center (11/19/2018)
- "*Probabilistic Phenotyping of Endometriosis from Self-Tracking Data*"
  NSF Smart and Connected Health workshop, University of Virginia (09/24/2018)
- "*Sequential Importance Sampling Bandits*"
  Columbia Data Science Day (03/28/2018)
- "*Bayesian bandits: balancing exploitation/exploration tradeoff via double sampling*"
  Columbia Data Science Day (04/05/2017)
- "*Variational inference for the multi-armed contextual bandit problem with linear Gaussian Mixture Models*"
  Frontiers in Computing Systems Symposium, Columbia Data Science Institute (03/24/2017)
- "*EHR Predictive Analytics as a Survival Task*"
  NSF Smart and Connected Health workshop, Boston University (03/21/2017)

Professional service

Journal Editorial Boards and Reviewing

- Editorial board of reviewers: Journal of Machine Learning Research (2022-)
- Reviewing: Journal of Machine Learning Research (JMLR) 2019-2022, Transactions on Machine Learning Research (TMLR), Springer Statistics and Computing, IEEE Transactions on Signal Processing (TSP), PLOS ONE, IEEE Signal Processing Letters, Statistics & Probability Letters, EURASIP Journal on Advances in Signal Processing, Communications in Statistics: Simulation and Computation, Digital Signal Processing, Computer Communications, Engineering Optimization

Conference Editorial Boards and Reviewing

- Program Committee member: ACML 2022-2024 (Area Chair), MLHC 2023-2024 (organizer, Program Committee)
- Reviewing: ICML 2019-2024 (Expert Reviewer), NeurIPS 2018-2023, AISTATS 2018-2024, IEEE ICASSP 2020-2024 & 2016-2017, MLHC 2018-2023, EUSIPCO 2020, NeurIPS2023 Workshop on Deep Generative Models for Health, UAI 2019, AABI Symposiums 2018-2020 & 2023-2024, AABI NIPS2017 workshop, FUSION 2017, IEEE SAM 2016, IEEE CAMSAP 2015 Systems, 2018.

Scientific evaluation committees

- Bilateral Research Cooperation Program MOST-FRQS: Artificial Intelligence and healthcare research program evaluator, 2022.
- National Science Foundation: Directorate of Computer & Information Science, Engineering and Division of Information and Intelligent Systems, 2018.

IEEE Signal Processing Society Member

Teaching Experience

2016 – 2018 **Instructor**, *Columbia University*

- Spring 2018 - *Graduate seminar "Data Science for mHealth"*: Classification and clustering for mHealth.
- Fall 2017 - *"Biomedical Informatics Data Mining seminar"*: Introduction to compressed sensing.
- Summer 2017 - *"Biomedical Informatics Data Mining seminar"*: Introduction to Monte Carlo estimation.
- Fall 2016 - *"Biomedical Informatics Data Mining seminar"*: Optimization techniques in deep-learning.

2011 – 2015 **Teaching Assistant**, *Stony Brook University*

- Spring 2015 - *Random Signals and Systems* (ESE 306)
- Fall 2014 - *Introduction to Electrical Engineering* (ESE 123)
- Spring 2014 - *Random Signals and Systems* (ESE 306)
- Spring 2013 - *Random Signals and Systems* (ESE 306)
- Fall 2012 - *Introduction to Electrical Engineering* (ESE 123)
- Spring 2012 - *Introduction to Electrical Engineering* (ESE 123)
- Fall 2011 - *Introduction to Electrical Engineering* (ESE 123)

2012 – 2014 **SBU Engineering Summer Camps**, *Stony Brook University*
Instructor and Teaching Assistant for high-school students interested in engineering careers.
